Intellera Cybersecurity and Privacy

Our services

 **intellera**
consulting

Agenda

01

About us

02

Our services

03

Our experience

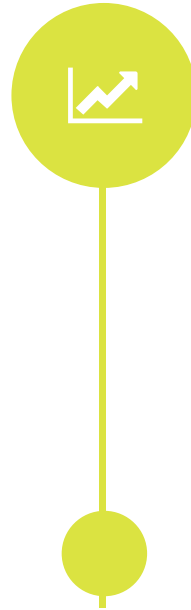

The **Cybersecurity & Privacy Competence Centre's main goal is to help** organizations and customers facing the challenges about Cybersecurity management, Data Protection and critical assets into an international context where cyber risks and attacks are constantly increasing.

Quality of services

The high quality of services provided is a distinguishing factor of our team and for particular Cyber Security issues. Excellence for us is habit.

New technologies

Our team has developed skills in the use of leading, market-leading security technologies in order to maximize the effectiveness and efficiency of related project activities.

Expertise multidisciplinare

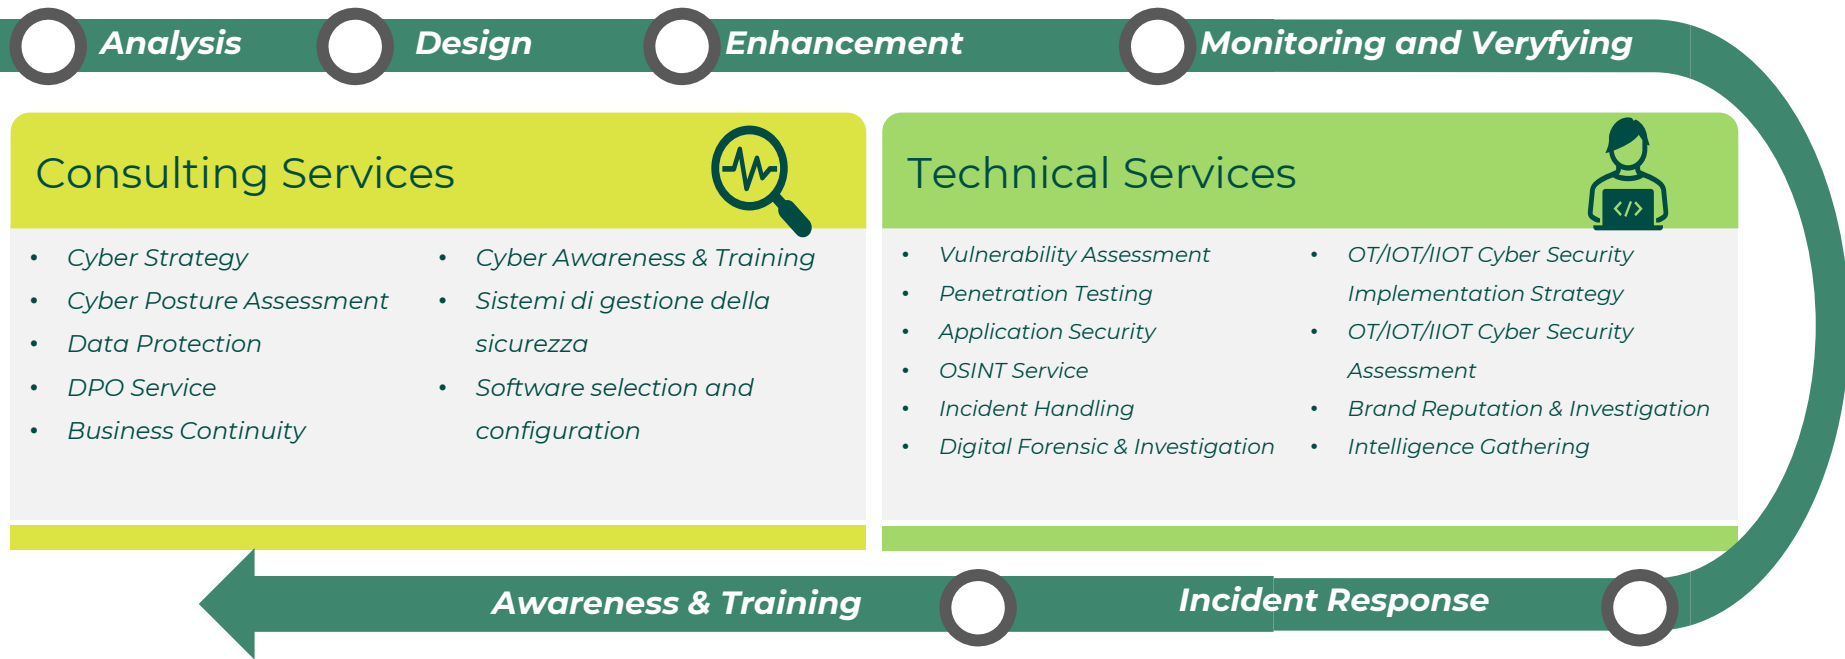

Our team has specialized, technical, management and legal expertise in order to respond effectively to increasingly complex Cyber Security and Data Protection needs.

The Cybersecurity & Privacy Team developed a **wide variety of services** to support organisations throughout the **Cyber Security Lifecycle**

...What we do?

Consulting Services

- *Cyber Strategy*
- *Cyber Posture Assessment*
- *Data Protection*
- *DPO Service*
- *Business Continuity*
- *Cyber Awareness & Training*
- *Sistemi di gestione della sicurezza*
- *Software selection and configuration*

Technical Services

- *Vulnerability Assessment*
- *Penetration Testing*
- *Application Security*
- *OSINT Service*
- *Incident Handling*
- *Digital Forensic & Investigation*
- *OT/IOT/IIOT Cyber Security Implementation Strategy*
- *OT/IOT/IIOT Cyber Security Assessment*
- *Brand Reputation & Investigation*
- *Intelligence Gathering*

Awareness & Training

Incident Response

...How we do it?

Seniority

The Management Team consists of **professionals** with high seniority and experience across services and sectors

Certificates

The Team has more than **50 specific certifications**. The management team constantly defines and implements the plan for new **FY certifications and training courses** for each role and professional profile

Skills and Competences

The Team as a whole, strong vertical and **market-exclusive competencies** for certain specialised services as well as expertise in managing complex projects.

Tools

The Team has equipped itself with its own **frameworks** and automated tools for the efficient and repeatable delivery of many of its services.

Our strategy, your benefits

This service main goal is to increase the **maturity level** of the Organization's operational security management capabilities in order to face the increasingly complex attack methods and evolving **risk scenarios**, both domestically and internationally, through the definition of a cybersecurity **policy**.

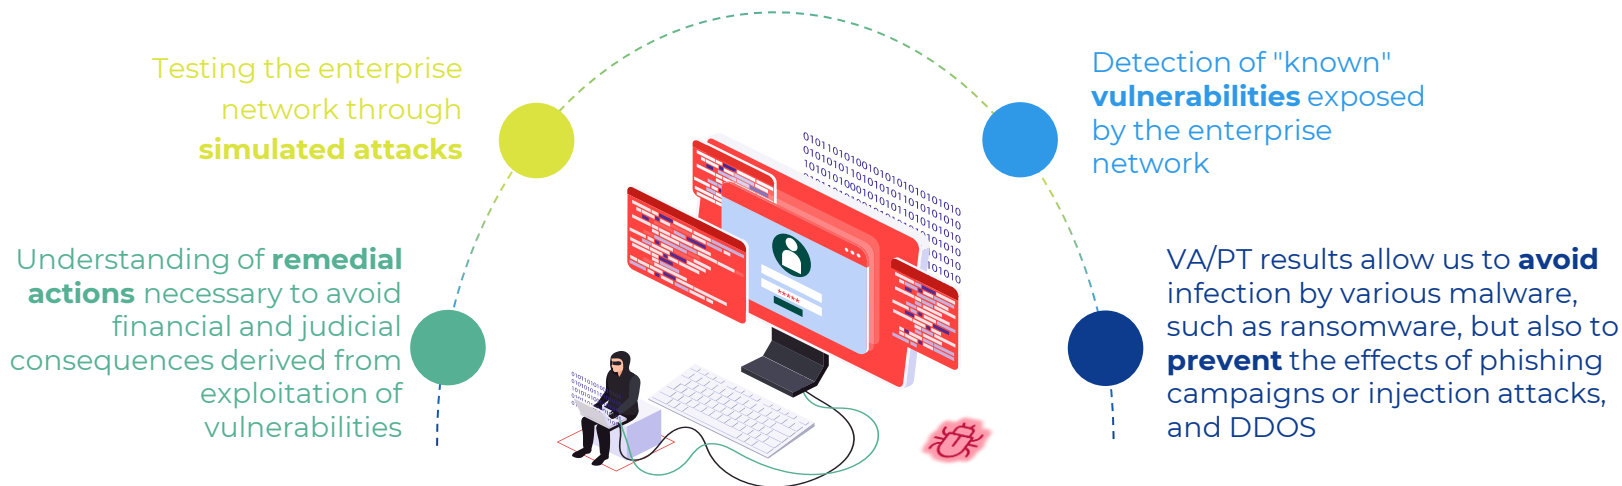

Vulnerability Assessment e Penetration Test

Our strategy, your benefits

The **Vulnerability assessment** service designs the **cyber security posture** of one or more networks, in order to analyse the risks and vulnerabilities exposed from the outside and from the inside. **Penetration testing** is an activity which aim is to validate the vulnerabilities of a corporate network, a machine or a software in order to find a related "exploit", i.e. the ability to exploit a vulnerability and turn it into a threat.

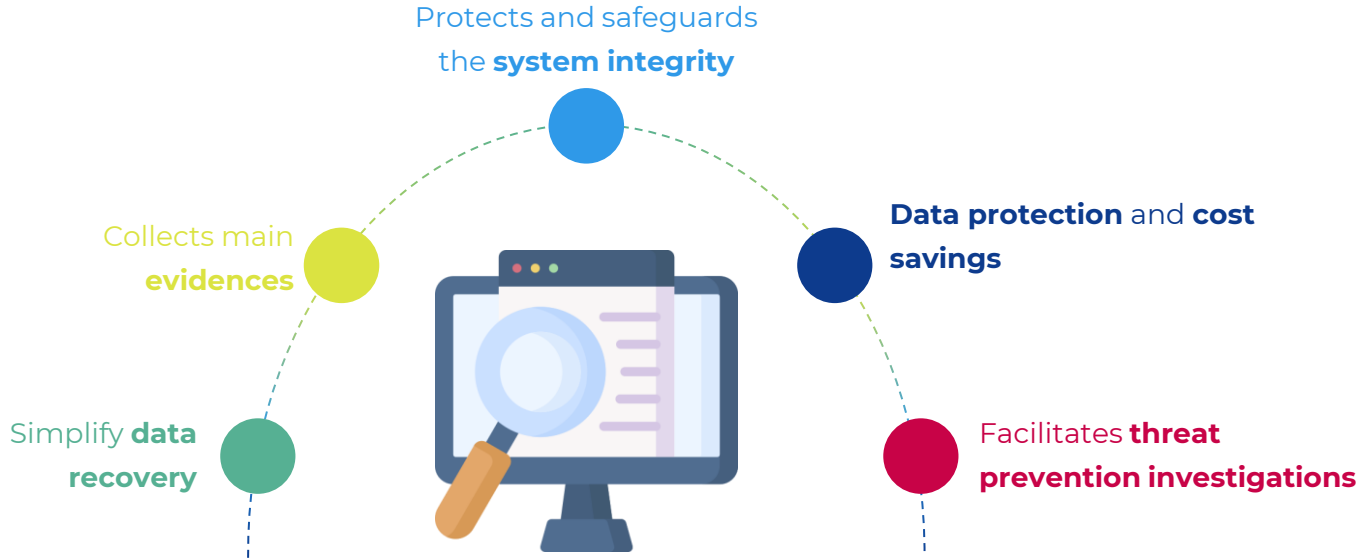

Digital Forensics & Incident Response

Our strategy, your benefits

This service is based on the **recovery** and **investigation** of material found on devices possibly menaced by cyber crimes, as well as the analysis and management of any computer security incidents according to international standards and frameworks, and the preparation of a report useful to increase the awareness about occurred incidents In order to develop the ability of avoiding future similar threats and scenarios.

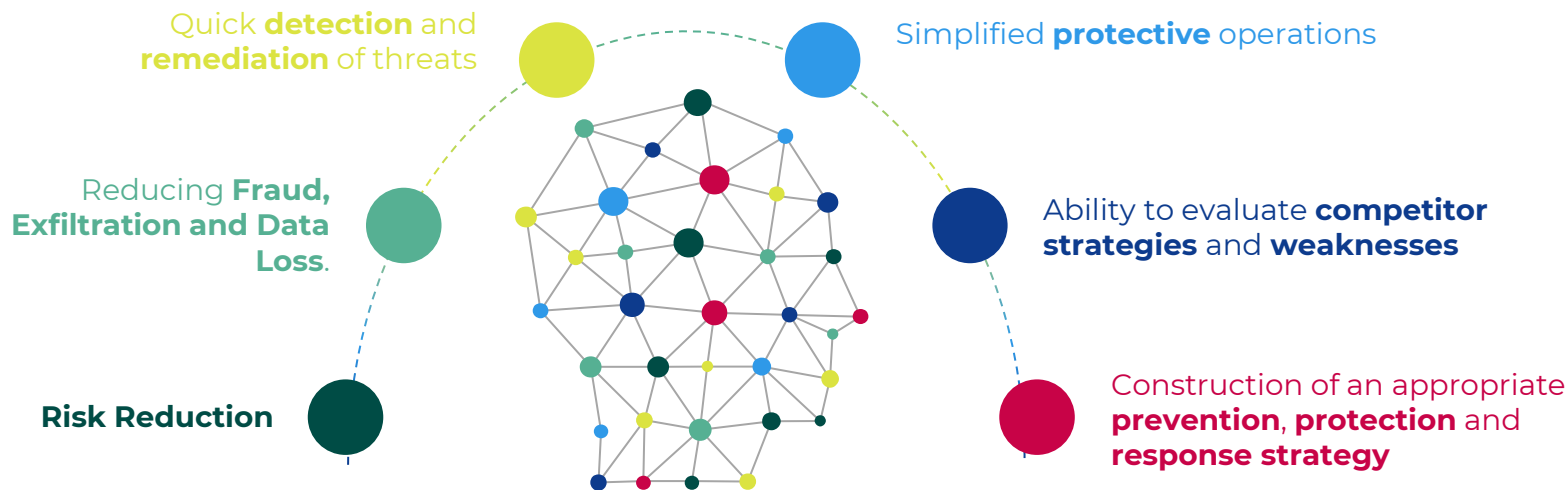

Our strategy, your benefits

Intelligence Gathering

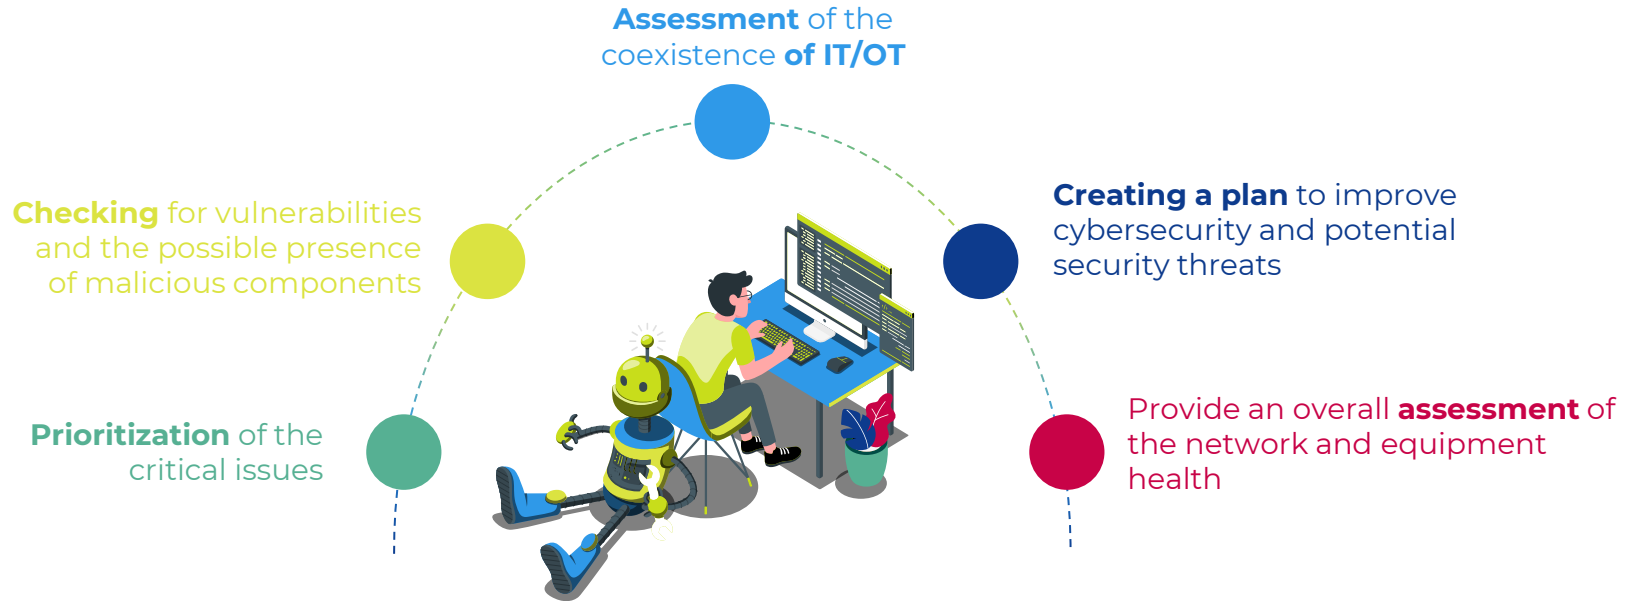

This service is aimed at creating high-level, detailed **reporting** based on **investigative analysis processes** related to domains or subjects to verify their exposure level to cyber threats. This service includes activities of: **OSINT, CLOSINT, GEOINT, SIGINT, IMINT, Social Engineering.**

Our strategy, your benefits

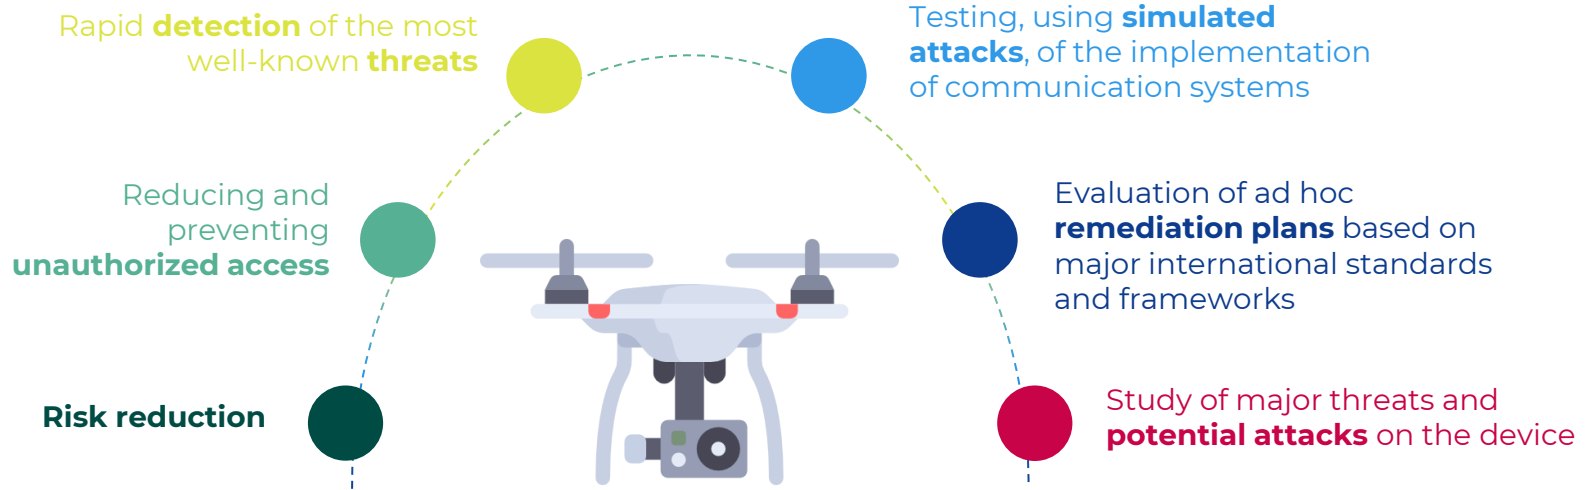

This service validates the **security posture** in the Information Technology and Operational Technology environment, covering both **information systems** and **'operational' systems** (ICS and SCADA devices) following and applying international methodologies, standards and frameworks.

Our strategy, your benefits

Security assessment service on remotely **piloted devices** through the use of offensive techniques aimed at highlighting their **criticalities** and **vulnerabilities**.

Compliance Normativa

Service aimed at implementing a system which tends to achieve **regulatory compliance**, with specific regard to the main **international standards** and **frameworks** and the **GDPR** in order to increase the Administrations and Organizations' **accountability** level.

Our strategy, your benefits

Our experience

Intellera carries out numerous projects (of different nature and complexity) in the cyber security field, pertaining to **Central PAs** (e.g., Consip, Ministry of Economy and Finance, Ministry of Health, INAIL, etc.), **Local PAs** (e.g., Roma Capitale, Lazio Region, Tuscany Region, Campania Region, City of Venice, etc.), other **public sector** entities (e.g., AgID, Sogei, Consip, etc.) and relevant players in the private sector

IAM/IAG

Implementation and governance of identity management solutions and processes

Cyber Security Strategy & Awareness

Activities to support the development of a strategic plan and delivery of training sessions

Security Assessment

Current posture assessment activities in cyber security, VA/PT

Cyber Security Assessment & Strategy

Cyber maturity level assessment and evolutionary strategy definition

Lotto 2 - Servizi di sicurezza

RTI contractor of remote security services for CAPs.

Incident playbook

Playbook definition activities for handling attack/security incident scenarios

Data Security

Support in evaluation of encryption strategies/tools and definition of erasure/retention rules/strategies

Cyber Security & Privacy Audit

Data security and protection level assessment activities for the Angolan electoral commission

VA/PT

Vulnerability Assessment and Penetration testing activities of the IT environment and addressing remediation/patching activities

Third Party Intelligence

Activities to assess the level of cyber risk exposure of major vendors using OSINT and search for information in the deep/dark web

Third Party Security Review

Review and evaluation of security requirements for services contracted with providers
